

Nederman acquires the assets of Ezi-Duct and Porex Environmental Engineering

The environmental technology company Nederman has acquired the assets of the Australian companies Ezi-Duct Pty Ltd and Porex Environmental Engineering Pty Ltd. Ezi-Duct and Porex Environmental Engineering manufacture & supply ducting, fume extraction and industrial air filtration equipment. With this acquisition Nederman strengthens its position and product range in the Australian market.

Ezi-Duct and Porex Environmental Engineering, with approximately 35 employees, will be part of Nederman's Duct & Filter Technology Division and trade as Nordfab Pty Ltd. There are many synergies between Ezi-Duct / Porex Environmental Engineering and Nederman and their respective strengths are very complimentary.

"With an increased awareness of delivery time and transport costs being crucial in the ducting business, we see a great opportunity with this acquisition to grow our market while remain close to our customer base. Making it easy for our customers to find us will continue to be of importance to us as it is part of our Fast, Friendly, and Reliable strategy", Jeppe Rasmussen, Sr VP Nederman and Head of Division Duct & Filter Technology states.

The purchase of the businesses by Nederman will provide customers with an international operation that can provide your clean air needs.

"Together, we have a good geographical coverage and a large installed base. We will continue to serve the Australian and Pacific region with the necessary products and services to secure clean air", Mr. Rasmussen concludes.
